Negotiations Day 10 Update

On Thursday (04/28), your negotiating committee met with the company throughout the day and night we worked to TA most of the non-economic proposals, including:

- Job Security
- New Work
- Seniority
- Personal Time off
- Vacations
- Holiday Schedule
- and more.

While there is still much work to complete in these negotiations, we have made significant progress in securing and cleaning up the language.

After the conclusion of most open items, the company presented its first economic proposal. "The proposal's substance is a slap to our members who have worked over a year without a GWI during a pandemic, stated Union Chief Negotiator Jeff Santini. In addition, the company has completely missed their opportunity in their commitment to a fair and equitable contract in the first pass.

Friday, your negotiating committee is prepared to counter the company's economic proposal and remind them of the membership's sacrifices to make this company profitable even through the pandemic.
