As we heard from all the businesses this morning one message was received time and time again; Each and every presentation started with "Thank you", "Thank you for all the members have done, working though this pandemic". While saying thank you is nice, we continued to reiterate the same message back to the company. We need serious **JOB SECURITY** language to protect our workforce in both Middletown and East Hartford. We have worked tirelessly through this pandemic and have continued to be on the front lines while most salary employees have stayed in the comfort of their homes, often "zooming" in their PJ's. We didn't turn our back on the company when covid was ravaging our communities and we won't accept the company turning their backs on us when it comes to strong job security language.
