Negotiations Day 7 Update

We wrapped up negotiations late today. We reached agreement on some contract language changes and on areas where neither side had changes.

Job security still hasn't been addressed yet along with our demands for retirement security & wage security. We are hoping to make some progress on Health Care soon with the goal of lower costs and better coverage for all. The company also needs to give us certainty on costs going forward instead of asking us to "trust them"! The company continues to ignore the fact they haven't been trustworthy in the past. Here is a link to the history of letter 22 and our job security language. <https://tapme.ws/lkd3gQ>
