living by Mother Jones**

0006 Monthly Report

The Union Safety committee has been informed that we have had numerous driving incidents on the Middletown campus recently. Employees walking in the parking lots, on sight and vehicles driving at a high rate of speed near or past the employees, running red lights and speeding thru cross walks. The speed limit in the parking lots and roads inside the plant is 15 MPH and 35 MPH where posted on the main road into the plant. Please follow the speed limits posted . If you hit someone by driving at that higher speeds you could give someone a serious injury or kill them. It will be on your conscience for the rest of you life. These scenarios are very dangerous. (see report [Click here](#)). If you are struck by a motor vehicle at 15MPH you would have a 90% survivability and the injury severity would be very low. This increases exponentially with the speed of the vehicle. At 40MPH the severity increases to 79% with serious injuries and 45% will die from their injuries. This all changes slightly with the type of vehicle and the person but the numbers don't lie. Please drive slowly. The **life you save could be your Union Sister or Brother , co-worker or friend in the shop.**

This article is not just for bargaining unit members. This is for all employees who drive or walk on Pratt & Whitney property and drive inside and outside of the gate. Driving is a privilege. Your license is a privilege and parking on Pratt & Whitney property is a

privilege. All these can be taken away or you could be fined very heavily, sued or put in jail, depending on the circumstances. As a volunteer in a volunteer fire department, I have attended numerous car accidents involving pedestrians. They are quite traumatic and troubling being in a Volunteer Fire Department. The Union has been informed of numerous cars on sight about specific vehicles.

*Please, I urge you drive the **posted speed limits** on site and off site, and **watch out for pedestrians in walkways/crosswalks.** Please park in designated parking areas and follow the **stop signs** and **signal lights.** They are not a suggestion. Thank you.*

Tier I auditors needed. These auditors will go around in their departments inspecting the area for EH&S issues on company time. You then will give the results to the EH&S to put in a data base. Please become a Tier I auditor.

Reporting injuries is key in reducing and eliminating another person from getting injured. Please report your injuries as soon as they happen.

**Safety Day is August 5th please stop out and see what's up for Safety.**

**"We must learn to live together as brothers or we are going to perish together as fools." Martin Luther King, Jr.**

Respectively submitted Chief Union Safety Representative Paul Dickes.

With our numbers on the rise again there may be chance that the company might go back to masks. Is there a chance to rethink the masks for Middletown? Currently there is no plan to change the mask requirements just ask Paige Hanson.

Current numbers as of July 5<sup>th</sup> in Middletown. In the [Middlesex County, Connecticut \(CT\) - U.S. COVID Tracker - Covid Act Now](#) you can view the latest numbers.

July 5<sup>th</sup> numbers we are at medium but are rising we may have seemed to level out only a few days or a week or so will tell after the holiday.

July 5<sup>th</sup> in the [CT Now numbers for daily tracking](#) to open cut and paste or click link

- The weekly reported cases are getting close to **exceeding 200** we are 180.4 number currently stabilizing
- Weekly covid admissions are over 10 per 100,000 we are at 11. per 100,000
- Patients w/covid are have stabilized but are below 10% we are at 3.5%.

Infection rate is up to 1.13.

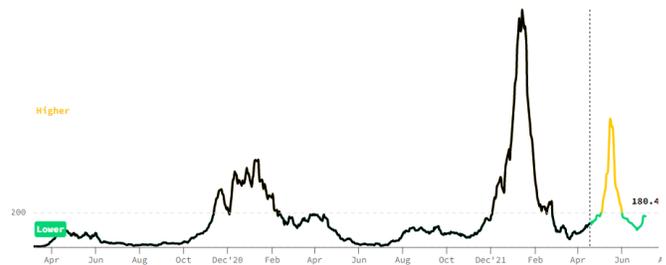

July 1<sup>st</sup>

- The weekly reported cases are not **exceeding 200** we are 133.6
- Weekly covid admissions are over 10 per 100,000 we are at 11.9 per 100,000
- Patients w/covid are have stabilized but are below 10% we are at 3.5%.

County	Weekly New Reported Cases	Weekly COVID Admissions	Patients w/ COVID	Infection Rate	Vaccination Rate

Community risk level metrics

WEEKLY NEW REPORTED CASES: **180.4** PER 100K  
 WEEKLY COVID ADMISSIONS: **11.0** PER 100K  
 PATIENTS W/ COVID: **3.5%** OF ALL BEDS

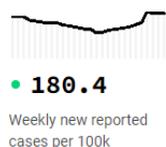

Over the last week, Middlesex County, Connecticut had 293 new reported cases (180.4 for every 100,000 residents). Reported cases do not include all at-home positive tests. Grading is not applied to weekly new reported cases prior to April 18, 2022, indicated by the dotted line. This date marks our change to measure community risk levels, a framework that is only relevant for the current phase of the pandemic.

Middlesex County, CT

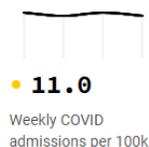

Updated on July 5

We aim to update our data by 1 PM EDT daily. Occasionally, when additional review is required, an update can be delayed by several hours. Note that certain data sources that we use (e.g., ICU hospitalizations) are only updated once per week.
